Refatorando o controller

Refatorando o controller

- Altere o arquivo

app/controllers/admins_backoffice/admins_controller.rb

```
o class AdminsBackoffice::AdminsController < AdminsBackofficeController
o   before_action :set_admin, only: [:edit, :update]
o   before_action :verify_password, only: [:update]
o
o   def index
o     @admins = Admin.all
o   end
o
o   def edit
o   end
```

Refatorando o controller

```
o   def update
o     if @admin.update(params_admin)
o       redirect_to admins_backoffice_admins_path, notice: "Administrador
atualizado com sucesso!"
o     else
o       render :edit
o     end
o   end
o
o   private
o
o   def params_admin
o     params.require(:admin).permit(:email, :password, :password_confirmation)
o   end
o
o   def set_admin
o     @admin = Admin.find(params[:id])
o   end
```

Refatorando o controller

```
o
o   def verify_password
o     if params[:admin][:password].blank? &&
o       params[:admin][:password_confirmation].blank?
o         params[:admin].extract!(:password, :password_confirmation)
o       end
o     end
o   end
```
